Commandant,  
Pulled the traps. RFI is out. 60-90 days is a best guess.

**Subject:** Santa Margarita Is, Mexico airfield

Commandant,  
Good news. US Embassy Mexico has been approved to shift funds for the airfield improvement at Santa Margarita Island airfield on the Baja Peninsula. This will make the airfield KC-130 capable.

Sir,

US Embassy Mexico has received formal approval to shift funds/monies to support ISM airfield infrastructure development. Transfer process for these funds/monies should take about 30-60 days; will then be immediately pushed/provided to USACE. US Embassy Mexico also in process of developing MOA with USACE to properly coordinate and support the airfield infrastructure development. Will provide updates sir. S/F, (b)(6)
